GENERAL INFORMATION
The System Sensor RTS151KEYA is an automatic fire detector accessory designed to test remotely located duct and beam detectors. For 4-wire detectors, the RTS151KEYA features a multi-colored LED that alternates between steady green and red. Green indicates power and that the detector board is in place. Red indicates alarm. For 2-wire detectors, the LED will show red for alarm. Consult the detector installation instructions for additional information.

The National Fire Protection Association and CAN/ULC-S536 has published codes, standards, and recommended practices for the installation and use of this product. It is recommended that the installer be familiar with these requirements, with local codes, and any special requirements of the local authority having jurisdiction.

1 RTS151KEYA remote test station
1 screw pack (2 mounting screws)
2 Keys

OPERATION
Test Function
Insert the key and turn clockwise to the “TEST” position.

Alarm Indication
With the key in the “TEST” position, some time will elapse (40 seconds maximum) depending on the detector type, before the alarm indicating LED will turn red.

Reset Function
Turn the key counterclockwise to the “RESET” position and hold. The LED should turn off. Then, turn the key back to the “NORMAL” position and remove. The RTS151KEYA is capable of resetting only certain models of detectors. Refer to the detector installation instructions for additional information.

Wiring Instructions
Consult the appropriate detector installation instructions for the applicable wiring diagram. The RTS151KEYA mounts to a single gang box (2 1/2” minimum depth), or directly to the wall or ceiling.

In Canadian applications, the RTS151KEYA is intended to be located in the same room as the smoke detector and within 60 feet of the unit.
